DOCKETED BY

IN THE MATTER OF THE  
APPLICATION OF PICACHO PEAK  
WATER CO., INC., FOR A RATE  
INCREASE

Docket No. W-02351A-11-0231

## STATUS REPORT

Picacho Peak Water Company ("Company") hereby files its status report regarding the Company's compliance with Arizona Department of Environmental Quality ("ADEQ") regulations.

The Company's point-of-use treatment systems continue to work well. The most recent monitoring tests demonstrated that these systems are treating the water to meet ADEQ's standards. After a recent inspection, ADEQ ordered the Company to install monitoring lights on the point-of-use system. This task was completed in mid-June.

1 Currently, the only customer that still needs treatment plant installed is the Dairy  
2 Queen. As previously explained, the Dairy Queen installed a treatment device several  
3 years ago, but it recently failed and now another system needs to be installed.  
4

5 The vendor had estimated that the treatment facilities within the Dairy Queen  
6 would be installed by no later than the end of August. However, to conserve water, the  
7 vendor recommended that the plumbing within the Dairy Queen be altered so that the  
8 water used as refrigerant cooling only not be treated. Further, after gathering more data,  
9 the vendor recommended a slightly larger capacity treatment system to ensure the peak  
10 demands are met comfortably.  
11  
12

13 The Company anticipated the work being complete by this time. However, there  
14 was concerns raised related to the disposal of the nitrates and the wastewater. The  
15 Company's understanding is that these issues were recently resolved and that the  
16 plumbing alterations and treatment system installation should be accomplished within the  
17 next sixty days. This is the last treatment device that will need to be installed.  
18

19 Respectfully submitted this 17<sup>th</sup> day of November, 2014.
